

Technical Data Sheet

Product

Xlure Checkpoint

Code

019-XLURE-CHK

Description

The combination of pheromone plus visual attractant makes for a powerful combination to successfully lure target insects.

Active Ingredients: Nature identical pheromones for the insects: *Plodia interpunctella* and *Ephestia* spp.

Other Ingredients: Polystyrene trap lined with craft board and coated with hot melt pressure sensitive adhesive. The adhesive is based on resins and synthetic rubber compounds, which have been prebaited with insect pheromone. The polyethylene pheromone dispenser is attached to the upper part of the trap.

Application

- Remove the lid from the trap.
- Insert your lure into the bottom of the trap. This can be our Checkpoint Recharge, M11 Lure of Xlure 4 Seasons.
- Insert the Checkpoint sticky liners. The liners are prebaited with pheromone and will contain the moths within the trap.
- Reattach the lid by twisting it into place.
- Then hang up using the green string provided in your problem area.
- Simply clean out the trap and insert a fresh pheromone dispenser and sticky liner once full.

Storage

- Store in cool, dry and well ventilated place.
- Keep away from heat, sparks and open flames.
- Refrigeration is recommended for long term storage.

Precautions

- Do not breathe in vapours.
- Avoid contact with skin and eyes.
- Wash thoroughly after handling.
